

CQ-1000 Dechlorinating Shower Filter

For a Healthier, More Enjoyable Shower... The Rainshow'r® Way

A better, healthier shower

You deserve healthier water in every aspect of your daily life, not just the drinking water. Our Rainshow'r® CQ-1000 dechlorinating shower filter provides a long lasting solution to the problems associated with exposure to excessive amounts of chlorine.

Chlorine is considered one of the most toxic elements found in nature.

The atomized brass KDF formula filter media effectively removes 90% or more of chlorine from shower water. Once in contact with the KDF®-55, chlorine in the water converts into an environmentally safe and harmless soluble chloride.

Because of this superior chlorine removal, you will see changes in the way your hair and skin feel including...

- healthier, younger looking skin
- softer, more manageable hair
- relief from dry skin & scalp
- less fading in color-treated hair

The CQ-1000NH is also available with name brand shower heads such as the:

- Highest Rated – Whedon chrome plated fixed-action designer head
- Internationally Recognized – Shower Pro Massage head with spray, massage and pause position in white and chrome.
- The most innovative shower head available — The Rainshow'r® designed Bernoulli shower head.
- Handheld shower kits in white or chrome by Whedon or Shower Pro.

Rainshow'r® uses a number of shower heads, handheld kits and water control devices. These are water delivery mechanisms only. They are not performance tested or certified by WQA. Only the filter is certified.

CW-1000 with the Whedon fixed-action designer head

CQ-1000 with the Shower Pro massage head

System tested and Certified by the Water Quality Association according to NSF/ ANSI 177 for the Reduction of Free Available Chlorine.
