

CIC Plus Series
*Carbon Impregnated
Scale Reduction Cartridges*

- ✓ Effective sediment, chlorine taste and odor reduction.
- ✓ Ideal for residential, commercial, and light industrial applications.
- ✓ High performance scale protection.
- ✓ Carbon Impregnated Filter Fibers for optimal performance.
- ✓ High dirt holding capacity.
- ✓ Superior performance and cost to benefit ratio.

HYDRONIX CIC SL SERIES CARBON IMPREGNATED SCALE REDUCTION CARTRIDGES

combine the benefits of a sediment filter with the chlorine taste and odor reduction characteristics of carbon block filters. They offer exceptional dirt holding performance and are ideal for a wide range of applications. With their dual action construction Hydronix CIC SL series filters allow for the reduction of sediment, dirt, sand, silt, and rust particles while laying down a special coating for superb anti-scale protection. All material is NSF and FDA compliant and does not pose a health risk to humans or pets.

HYDRONIX CIC SL SERIES CARBON IMPREGNATED SCALE REDUCTION CARTRIDGES

are specially designed professional grade scale prevention, sediment, chlorine taste and odor filters that incorporate Hydronix PhosCoat™ media. PhosCoat™ is a specially designed media that lays down a unique coating on pipes, tank less water heaters, fixtures, Solar Hot Water Systems, Boilers, and appliances that creates a barrier which does not allow scale to materialize and attach itself to the surface. Hydronix CIC SL series filters with PhosCoat™ are ideal for a wide range of residential and commercial applications where professional grade carbon, sediment reduction and scale prevention is desired.

WARNING: Do not use with water that is microbiologically unsafe or of unknown quality without adequate disinfection before or after the system.

NOTE: The granular activated carbon cartridges will contain a very small amount of carbon fines (very refined black powder). After installation, a new cartridge should be flushed with sufficient water to remove all traces of the fines from your water system before using the water. Each time you use your filtered water tap for drinking or cooking purposes it is recommended that you run (flush) the tap for at least 20 seconds prior to using water. This is particularly important if the water tap has not been used daily.
