Provides clear, fresh, premium quality ingredient water for great tasting coffee and beverages.

New and improved Micro-Pure II media inhibits the growth of bacteria

Everpure's unique filter blend using activated carbon reduces chlorine taste and odor and other offensive contaminants

Saves energy by reducing scale build-up. Proportioned scale inhibitor feed dramatically prevents limescale from forming in brewers.

Engineered to always feed the correct amount of scale inhibitor into each volume of water

Precoat submicron technology reduces dirt and particles as small as 1/2 micron in size and reduces health contaminants such as cysts

Increases holding time of coffee

Sanitary cartridge replacement is simple, quick and clean. Internal filter parts are never exposed to handling or contamination

INSTALLATION TIPS

Never use saddle valve for connection

Use 3/8" water line

Install vertically with cartridge hanging down

Allow 2-1/2" clearance below the cartridge for easy cartridge replacement

Flush BH² cartridge by running water through filter for three minutes at full flow
